Two-Factor Authentication

Open the app store with mobile phone and download google authenticator.

The specific operation method can refer to

<https://support.google.com/accounts/answer/1066447?hl=zh-Hans>

Click **[Set]** after **[Two-Step Authentication]**, use mobile phone to open the google authenticator to scan the QR code, and copy the ciphertext to save it properly, for the google authenticator reset after the device is lost. Enter the six-digit password displayed on the google authenticator in the **[Password on Authenticator]** field, and click **[Enable]** in the lower right corner to complete the verification.

Two-Factor Authentication

Two-Factor Authentication

- 🍏 iPhone iOS
- 🤖 Android

Step 1
Install Google Authenticator app on your smart phone and open it. [Installation Instructions](#).

Step 2
Scan the following QR code with Google Authenticator APP, or add ciphertext to the validator manually.

QR code 

🔗 Ciphertext 

It is recommended to backup ciphertext for recovery.

Step 3
Fill in the dynamic password displayed by your phone to activate Two-Factor Authentication.

Password on the authenticator
